☆ Summary

☑ Frontend Engineer with **7 years** of experience in building high-performance web applications.
☑ Track record of delivering complex projects using **React** and **TypeScript** across various domains.
☑ Expert in **modern frontend technologies** with **full-stack development** experience.

💻 Technical Skills

- **Programming Languages:** JavaScript, TypeScript, HTML5, CSS3.
- **Libraries & Frameworks:** React, Next.js, SSR, Node.js, Express.js.
- **State Management:** Redux, Zustand, React Query, Context API, Apollo Client.
- **Styling & UI:** TailwindCSS, Styled-components, SCSS, shadcn/ui, Material UI.
- **Tools & Platforms:** REST, GraphQL, WebSocket, AWS, Vercel, CI/CD, Webpack, Vite, Jest, Git.

🗂 Professional Experience

Senior Frontend Engineer
Usetech
Mar 2024 - Present
1 year 1 month

- Developed the frontend for a **digital assistance platform**, providing users with personalized recommendations, educational materials, and access to services for navigating life challenges such as oncology, bullying, domestic violence, and more.
- Designed and implemented the application using **Feature-Sliced Design (FSD) architecture** to ensure better scalability, maintainability, and modular development.
- Built key features with **Next.js** and **GraphQL**, including dynamic content management, search functionalities, recommendations, interactive guides, and role-based authentication.
- Enhanced UI/UX using **Tailwind CSS**, **Shadcn** and **AWS S3**, optimizing performance with **server-side rendering (SSR)**, **code splitting**, and **efficient state management**.
- Conducted **code reviews** and collaborated with **cross-functional teams** in a Scrum environment, actively contributing to sprints, stand-ups, and retrospectives for efficient feature delivery.

Frontend Engineer
Altabel Group
Feb 2023 - Mar 2024
1 year 1 month

- Developed and maintained a **food ordering web application** from scratch, serving companies and employees to place and manage food orders efficiently.
- Implemented essential functionalities such as authentication, role-based access, order processing, payments, analytics, and menu creation using **React**, **TypeScript**, and **React Query**.
- Improved application state management with **Zustand** and designed interactive analytics dashboards using **Chart.js**.
- Built responsive design using **MUI** and **Vite**, with deployment through **AWS Amplify**.

Frontend Engineer | Full Stack Engineer
Kreo Software
Nov 2018 - Jan 2023
4 years 2 months

- Contributed to multiple **SaaS projects** in the construction industry, including Skema AI, Kreo, and Kreo Modular.
- Developed complex features such as report builders, SVG-based drawing tools, real-time chats, interactive cost tables, and 3D model integrations using **React**, **Redux**, **Redux-Saga**, and **Styled-Components**.
- Built and maintained **REST APIs** using **Express.js** while integrating cloud storage with **AWS S3** and working with **DynamoDB**.
- Expanded the reusable component library, fixed bugs and wrote unit tests with **Jest**.
